### Newsletter - Winter 2021

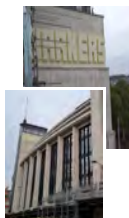

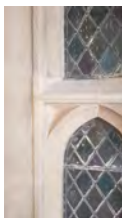

We continue to supply Cadeby Bed 1 sections for the ongoing restoration works to the Lincolns Inn project in London, where works have progressed to the Library building.

We recently sourced Tottenhoe Clunch directly from the quarry to match existing clunch stonework to a private property. The stone was used to reproduce existing quoins to the main gable end, together with window jambs, surrounds and lintels where the existing stone had deteriorated. Yorkstone from "Edgehill" quarry was then used to replace the window sills.

We recently replaced damaged details in Park Lane Bath Stone to Barclays Bank, Neath. We supplied various details including an interesting string section and 22 balusters to the parapet.

We have used various granites for kitchen worktops, but the most interesting granite project was supplying the honed Impala granite for the new Metropolitan Police memorial in Hendon. Setting out the inscription without having a joint line through the wording was challenging, but the result was achieved.

We have been busy supplying various bespoke memorials for churchyards and cemeteries despite national delays in shipping for most stone imports.
